

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings of the claims in the application:

**Listing of Claims:**

1. (Currently Amended) An apparatus, comprising:  
a body having at least a first non-linear edge having a first wavelength, a second non-linear edge having a second wavelength, said first wavelength being different from said second wavelength, said first non-linear edge adapted to be used to make a portion of an associated fabric pattern, wherein the fabric portion has an edge such that the shape of the fabric portion edge resembles said first non-linear edge, wherein said first non-linear edge is adapted to be used to make associated fabric blocks for the fabric pattern, said shape of the fabric portion edge resembling said first non-linear edge is adapted to be visible in the fabric block.
2. Cancelled.
3. (Currently Amended) The apparatus of claim [[2]] 1, wherein said second non-linear edge is adapted to be used to make a portion of the fabric pattern, wherein the shape of the fabric portion edge resembles said second non-linear edge.
4. (Currently Amended) The apparatus of claim [[2]] 1, wherein the shape of said first non-linear edge is different from the shape of said second non-linear edge.
5. (Original) The apparatus of claim 1, wherein said body further comprises demarcations for measuring length.

6. (Original) The apparatus of claim 1, wherein said first non-linear edge is a wavy pattern.
7. (Currently Amended) The apparatus of claim [[2]] 1, wherein said second non-linear edge is a wavy pattern.
8. Cancelled.
9. (Currently Amended) The apparatus of claim [[2]] 1, wherein said second non-linear edge is adapted to be used to create an associated outside edge of the fabric pattern.
10. (Original) The apparatus of claim 1, wherein said fabric pattern is for a quilt.
11. (Original) The apparatus of claim 1, wherein said body further comprises a first aligning gauge line.
12. (Currently Amended) A method for making a fabric pattern, comprising the steps of:
  - (a) providing a pattern measuring device comprising a body having a first non-linear edge having a first wavelength and a second non-linear edge of having a second wavelength, said first wavelength and second wavelength being different;
  - (b) providing pieces of fabric, each of said pieces having an edge;
  - (c) cutting at least two pieces of said fabric to a predetermined width;
  - (d) overlapping the edges of the two pieces of fabric a predetermined amount;
  - (e) positioning said first non-linear edge of said pattern measuring device over said fabric;
  - (f) cutting said fabric along said first non-linear edge such that said fabric edges have a non-linear pattern;
  - (g) mating said non-linear edge of said first piece of fabric with said non-linear edge of said second piece of fabric;

(h) sewing said non-linear edges together;

(i) forming a visible seam between said non-linear edges;

[[ (i) ] (j) repeating steps (c) to [[ (g) ] (i) to form a block of fabric using only said first non-linear edge of said pattern measuring device;

[[ (j) ] (k) forming a plurality of fabric blocks; and

[[ (k) ] (l) sewing said fabric blocks together to create a fabric pattern having a visible non-linear pattern.

13. (Original) The method of claim 12, wherein said first non-linear edge is a wavy pattern.

14. (Original) The method of claim 12, wherein the step of mating said non-linear edge of said first piece of fabric with said non-linear edge of said second piece of fabric further comprises the step of mating a crest of said first piece of fabric with a trough of said second piece of fabric.

15. (Original) The method of claim 12, wherein the fabric pattern is for a quilt.

16. (Original) The method of claim 12, wherein the fabric pattern is for a placemat.

17. (Original) The method of claim 12, wherein the fabric pattern is for a pillow.

18. (Currently Amended) A method for making a quilt, comprising the steps of:

(a) providing a pattern measuring device comprising a body having a first non-linear edge having a first wavelength and a second non-linear edge of having a second wavelength, each of said non-linear edges having a wavy pattern, said first wavelength and second wavelength being different;

(b) providing pieces of fabric, each of said pieces having an edge;

(c) cutting at least two pieces of fabric to a predetermined width;

- (d) overlapping the edges of the two pieces of fabric a predetermined amount;
- (e) positioning said first non-linear edge of said pattern measuring device over said fabric;
- (f) cutting said fabric along said first non-linear edge such that said fabric edges have a non-linear pattern;
- (g) mating said non-linear edge of said first piece of fabric with said non-linear edge of said second piece of fabric by mating a crest of said first piece of fabric with a trough of said second piece of fabric;
- (h) sewing said non-linear edges together;
- (i) forming a visible seam between said non-linear edges
- [[ (i) ] (j) repeating steps (c) to [[ (g) ] (i) to form a block of fabric using only said first non-linear edge of said pattern measuring device;
- [[ (j) ] (k) forming a plurality of fabric blocks; and
- [[ (k) ] (l) sewing said fabric blocks together to create a quilt having a visible non-linear pattern.

19. (New) The apparatus of claim 1, wherein only said first non-linear edge is adapted to be used to form the fabric block.
